New stuff (api's/languages/techniques/platforms)	++++	Web Security	+++
Salesforce/apex	+++	Xamarin	+++

Very good = +++++

Good = +++

Fair = ++

Moderate = +

**Profile**

I like the challenge of fathoming complex problems, structures and data, to analyse and understand them, and then to find a solution to the problem at hand that balances elegance, efficiency and pragmatism.

**Languages**

	Understanding	Speaking	Writing
Dutch	Native	Native	Native
English	Good	Good	Good
German	Good	Fair	Moderate

**Working experience**

<b>Werkgever</b>	Freelance for Vandebron
<b>Locatie</b>	Amsterdam
<b>Periode</b>	June 2017 – November 2017
<b>Functie</b>	Salesforce developer

**Description of work**

Vandebron uses Salesforce to manage (potential) customers, and has built a number of custom flows with links to external systems like Ecedo and Navision. In this environment I used apex code and visualforce pages and components to improve existing flows, and create new ones. Also I debugged and optimised the existing code base.

<b>Employer</b>	Freelance
<b>Location</b>	Amsterdam
<b>Period</b>	February 2017 – Now
<b>Function</b>	Allround developer

**Description of work**

After some studying (Xamarin forms, Salesforce apex, some javascript frameworks like React and React Native) back to work.

For Mascus B.V. the debugging of differen parts of their existing Salesforce org, plus making some new screens, like one to streamline the invoicing process.

Also I did a small assignment for IKNL to improve their Jenkins instance that was doing the continuous integration of their WPF project.

I am maintaining, and improving the app FootScout both in native iOS (Swift) and Android (Java).

<b>Employer</b>	72 Media
<b>Location</b>	Amsterdam
<b>Period</b>	November 2013 – November 2016
<b>Function</b>	Partner & CTO

**Description of work**

I became partner of 72 Media, a young company that tries in many ways to create qualitative, nice and beautiful applications; Online, mobile as well as in 3D for Oculus Rift and Google Cardboard.

Rabobank/Interpolis is a large customer for whom we made some very nice applications, like the Rabo Financial check, and Risigo (<https://workplace.risigo.nl/>). In-house we created a risk management application (<https://oodit.nl/>), that is in currently being marketed.

In my role as CTO I was responsible for the whole lifecycle of our applications. In the concept phase, to come up with a technical solution and estimate on required effort. In development phase to ensure quality and progress and, together with project managers, to make the customers completely satisfied with what we delivered. Also to make sure the DTAP street stayed up and running. In production it was monitoring, and proactively solving any problems that arose on the server or in the applications.

Most of our applications were running on (virtual) windows servers, using IIS and MSSQL server.

To name a couple of terms and products that we used: Agile, Scrum. Jira, Git, Teamcity, Resharper, Angular, Knockout, Sql server, MongoDB, Titanium, Xamarin, Unity3d, Selenium, Unit testing, MVC, EF 6, OWASP, devops, DTAP, Objective-C, .NET, api, json, rest services.

<b>Employer</b>	Freelance
<b>Location</b>	Amsterdam
<b>Period</b>	November 2009 – November 2013
<b>Function</b>	All-round developer

**Description of work**

Different projects, for instance:

- Risk inventarisation App for Interpolis/Rabobank, for 72 Media, in objective-C.
- 1 tegen 100 app in Titanium, for Moblio, sadly never live because of late concerns of client.
- Lottery app for 3 largest mobile platforms, for Moblio.
- Wie is de Chef / Topchef app on iPad for RTL nederland via Moblio.
- Two in-house iOS apps for Getronics/KPN via Sywan.
- Data warehousing application to gather, aggregate and report data from different sources, one of which was Google Adwords using Cognos for Omnicom Media Group via HumanContent.
- Hotel/event reservation application; a .NET web app met VIPS back office for among others Slagharen & de Bonte Wever, via Free Time Company.
- Office Per Minute, a platform for renting flexible workspace; a native app for the four mobile platforms, plus back office / web services in .NET.
- RequestXL, for CISICT via HumanContent. A .NET web application for health organisations to do, among other things, ROM-measurements and to reporter on patients and departments. Used by, among others Mediant and Altrecht.

<b>Employer</b>	Mirabeau
<b>Location</b>	Amsterdam
<b>Period</b>	March 2008 / November 2009
<b>Function</b>	Senior Software engineer
<b>Software (environment)</b>	C# .NET, HTML/JavaScript, MSSQL, SVN

**Description of work**

Projects like:

- AutoTrader.nl, rebuilding the backend system for importing, exporting and enriching of the advertisement data, and connecting to the current front-end website. Using C#, SQL server, web services, FredHopper and the data manager from Pentaho/Kettle, an open-source ETL tool to model datastreams. This was the first truly agile project that I worked on.
- Health Impact Solutions, an online health scan with treatment-modules and online coaching. For this agile project I was the project lead as well as the main architect.

<b>Employer</b>	Strawberries
<b>Location</b>	Amsterdam
<b>Period</b>	December 2005 / February 2008
<b>Function</b>	Programmer
<b>Software (environment)</b>	C# .NET, HTML/JavaScript, MSSQL, PHP, Flash/actionsript/SVN

**Description of work**

Projects like:

- Hunkemöller (www.hunkemoller.nl & --.de, de other countries were rolled out in 2008). In a team with C#.NET, Commerce 2007, Flash en our own C# CMS we made a webshop, including the back-office with product enrichment, order -, and customer management.
- Design.nl, a PHP site with different kind of lists of articles. For this I extended the new own (PHP-) CMS of Strawberries with i.e. a (soap) link with mass mailer Tripolis.
- Pratenonline.nl, a site for depressed youths, where they can chat anonymously with professional care workers. Also a back office for statistics and data.
- A Flash CD-rom for the ministry of foreign affairs, to promote Holland, with a lot of image-, map and statistical data.

**Employer** Basic Orange  
**Location** Amsterdam  
**Period** December 2000 / December 2005  
**Function** Programmer  
**Software (environment)** ASP, HTML/JavaScript, MSSQL, Flash/actionsript

## Description of work

- Occasion sites. Like [www.autobytel.nl](http://www.autobytel.nl), [www.sternplaza.nl](http://www.sternplaza.nl), [www.autoboulevard.nl](http://www.autoboulevard.nl) en [www.automarkt.nl](http://www.automarkt.nl). For these websites I created a database in MS-SQL server, to contain the occasions together with enriched data like photo's, details and remarks. Daily in- and exports are made from this data, to and from companies like autotrack, the RDC and VWE. Over the years I (re) created all these sites.
- For Disney I created a temporary actionsite: [www.disney3plus1.nl/be](http://www.disney3plus1.nl/be), in C#, Including a closed email loop, and a link to bibit for payments.
- For [www.uu.nl](http://www.uu.nl) (the university of Utrecht) I created in 2000, together with an other programmer, the content management system, in (classic vbscript) asp, MS-SQL en javascript.

**Employer** Freelance  
**Location** Amsterdam  
**Period** June 2000 / January 2003  
**Function** Programmer  
**Software (environment)** Cobol, C++, VB

## Description of work

Different projects, from security/systems administration to creating a TCP interface for online gaming. For Eurolines NL & BE I did maintenance and extending of their (COBOL-) reservation system.

**Employer** Eurolines Nederland B.V.  
**Location** Amsterdam  
**Period** 1996 / juni 2000  
**Function** Systems administration / programmer / CTO  
**Software (environment)** Cobol, (bash-) scripting, Unisys System V Unix

## Description of work

As CTO "avant la lettre" I was responsible for all (20 to 40) pc's, (ticket-) printers & servers, and advising the management about investments in new technology. I fixed bug and extended the COBOL reservation system, creating an interface with a web server, to enable online ticket sales, and a complete lost luggage application, all in COBOL.
